Blueprint Retirement Advisors relies on process-driven planning to help clients make the most of their financial resources. The company delivers a high level of personal service to business owners and individual investors. The Blueprint Design Review process helps clients evaluate financial decisions for both long- and short-term issues. No products or strategies are recommended without careful examination of the entire financial picture.

Blueprint Retirement Advisors works with business owners and plan sponsors to build and manage ERISA-based plans, such as:

- 401k
- 403b
- Profit Sharing
- SIMPLE IRA
- Payroll Deduction

According to ERISA rules, the sponsor is the plan's Prudent Investment Expert. This role makes them personally liable for what happens with the investments inside the plan. Such a risk poses significant personal liability—and is completely unnecessary.

Wilson commented, "We recommend offloading this fiduciary responsibility by structuring the plan with a 3(38) election, which allows a plan sponsor to shift 100% of the fiduciary liability to the investment advisor. Working with Blueprint and a 3(38) election shifts the plan sponsor's role from a fiduciary to a monitor. Additional responsibility can be shifted using the 3(16) election, which removes the duties of plan management and administration from the sponsor. Once your plan is in place, regular participant education sessions (on-site or online) are offered, so all plan participants can stay current with their retirement investments."
